

Network Security Report

Analysis results

This report aims to analyze and detect vulnerabilities in a private network.

Date: 2026-06-24 22:34

Target: 192.168.56.102

List of devices:

IP Address
192.168.56.102

Device: 192.168.56.102

Operating System Information:

Information on open ports:

- Port: 22/tcp, Service: ssh, Version: OpenSSH for_Windows_8.1 (protocol 2.0)
- Port: 53/tcp, Service: domain, Version: Simple DNS Plus
- Port: 135/tcp, Service: msrpc, Version: Microsoft Windows RPC
- Port: 389/tcp, Service: ldap, Version: Microsoft Windows Active Directory LDAP (Domain: test.local, Site: Default-First-Site-Name)
- Port: 593/tcp, Service: ncacn_http, Version: Microsoft Windows RPC over HTTP 1.0

Insecure Services or Versions Detected:

- Port: 22/tcp, Service: ssh, Version: OpenSSH for_Windows_8.1 (protocol 2.0)
- Port: 53/tcp, Service: domain, Version: Simple DNS Plus
- Port: 135/tcp, Service: msrpc, Version: Microsoft Windows RPC
- Port: 389/tcp, Service: ldap, Version: Microsoft Windows Active Directory LDAP (Domain: test.local, Site: Default-First-Site-Name)
- Port: 593/tcp, Service: ncacn_http, Version: Microsoft Windows RPC over HTTP 1.0
